STRUCTURE

SPC flooring stands for Stone Polymer Composite, and consists of polyvinyl chloride, natural limestone powder and stabilisers.

Being completely formaldehyde-free, it is thus very safe for your environment.

Known for being 100% waterproof with , these engineered luxury vinyl planks use advanced technologies to beautifully mimic natural wood and stone.

SPC is a perfect combination of strength of stone and the beauty of marble flooring.

With multiple layers fused together, SPC features a rigid core which provides stability and indentation resistance, and is thus very durable as a flooring - retaining its luxurious look for decades.

SPC flooring provides a seamless look and our collection showcases a multitude of beautiful natural stone emboss options.
